Ado Yasir Hassan

Frontend Software Engineer

I am a frontend engineer with 5 years of experience building responsive, user-friendly web apps with React. I focus on clean code, smooth UX, and enjoy turning ideas into polished interfaces through close collaboration with teams.

Experience

- July 2024 - Present

Hotostash LLC | Nigeria

Senior Frontend Engineer

Building and optimizing a seamless, high-performance user experience. Responsible for developing scalable UI features, enhancing image uploads, payments, and real-time notifications, and setting coding standards. Collaborate with backend engineers and designers, refine caching strategies, and use PostHog analytics to improve user engagement as Hotostash grows
- Aug 2023 / Contract

Shahuci Global Resources | Nigeria

Frontend Engineer

I develop web interfaces that users love. I code and style web pages, ensure they work smoothly on different devices and browsers, and strive for accessibility. I also collaborate with cross-functional teams, review code, and embrace ongoing learning to keep pace with the ever-evolving frontend landscape.
- Aug 2020 - Aug 2023

Brainstorm IT Solutions | Nigeria

Frontend Engineer

I create user-friendly web interfaces using React. I ensure responsive design, cross-browser compatibility, and accessibility, optimizing performance and integrating data. I collaborate with designers and backend developers, conduct code reviews, and stay updated with industry trends to deliver a seamless user experience.
- Sep 2021- Aug 2022

NYSC | Federal Medical Center | Birnin Kudu, Nigeria

Frontend Engineer

My role encompasses evaluating program effectiveness, monitoring budgets, analyzing performance metrics, assessing policies, providing project management support, engaging stakeholders, identifying risks, contributing to continuous improvement efforts, and instructing students undergoing training within the organization.

Skills

Web & Mobile

HTML, CSS, JavaScript, TypeScript, Bootstrap, Tailwind CSS, Material UI, React, Next.js, Redux, React Native, Jest, Expo, API Integration, Git, Responsive Design, Mobile-First Design, UI/UX Design, Canva, Performance Optimization

Projects

○ Project: Hotostash (hotostash.com)

Role: Senior Frontend Engineer

I worked on Hotostash, an event management platform that gained **800+** users in less than 2 months. I built features like album creation, event invitations, transparent contributions, and consensus-based fund release, along with auto-generated invitation cards, ensuring a seamless experience for weddings, birthdays, and parties.

○ Project: Bitcoops (bitcoops.com)

Role: Frontend Engineer

Contributed as a Frontend Engineer to Bitcoops, an Automated Cooperative Society System with **10,000+** users, designed to modernize and streamline cooperative operations. Developed features for member management, financial transactions, record-keeping, and administrative tasks, ensuring a seamless user experience.

○ Project: Drugcipher (drugcipher.vercel.app)

Role: Frontend Engineer

Drugcipher is a blockchain-based anti-counterfeiting system. As a frontend engineer, my responsibilities included designing and implementing user interfaces, integrating backend functionalities, and ensuring a seamless user experience. I collaborated with the team to create responsive and intuitive interfaces, allowing users to efficiently interact with complex pharmaceutical data.

○ Project: Mylikita (mylikita.com)

Role: Frontend Engineer

Contributed as a Frontend Engineer to Mylikita, a personalized e-commerce platform for beauty and cosmetic products, serving **80,000+** users. Developed and enhanced the user interface, optimized product browsing and purchasing, and ensured cross-browser compatibility. Collaborated with designers and backend developers to create a visually appealing, user-friendly experience tailored for beauty enthusiasts.
